SUMMARY

Dynamic Full Stack Developer specializing in AI-integrated web applications and scalable system architecture. Proven track record in building high-impact solutions, including a tourism platform with AR/VR capabilities and an AI-driven healthcare monitor. Winner of GDG Atlas OnCampus, with a focus on delivering user-centric technology and high-performance code.

PROJECTS

Lets Explore -- AI Tourism Platform

May 2025 - Present

- Leveraged **React.js** and **Three.js** to conceptualize AR/VR-based monument exploration with 3D models.
- Integrated **Web Speech API** for audio-guided navigation and voice-based site interaction.
- Designed an AI travel assistant using **LLMs (Gemini/OpenAI)** to provide real-time itinerary support.
- Implemented Emergency SOS features with **Google Maps API** to locate nearby hospitals and services.

NeuroGuard -- AI Healthcare Web Platform

Feb 2024 - Present

- Developed a full-stack healthcare monitor using **Node.js**, **Express**, and **FastAPI** for real-time AI processing.
- Designed and developed a healthcare-focused web platform showcasing AI-driven health monitoring concepts.
- Translated complex healthcare ideas into simple, user-friendly **Tailwind CSS** web interfaces.

V2V Communication & Vehicle Black Box System

Oct 2025

- Designed a Vehicle-to-Vehicle (V2V) system using **C++** and **MQTT** to exchange safety and alert data.
- Built a hardware-integrated black box system using **Arduino/ESP32** to record speed, location, and event data.
- Enabled real-time accident data logging for post-incident analysis and emergency response.
